02

INDONESIA

As the world grapples with the impacts of climate change, investors and financial institutions must proactively address the risks and opportunities associated with this critical issue. The ISSB Standards provides a framework for companies to disclose climate-related financial risks and opportunities to investors, lenders, and insurers.

Our ISSB Standards Training Course will cover key aspects of the framework of both the IFRS S1 General Disclosure of Sustainability-related Financial Information ("IFRS S1") and the IFRS S2 Climate-related Disclosures ("IFRS S2"). In addition, it also including governance, strategy, risk management, metrics, and targets.

Objective

The main objective of the ISSB Standards Training Course is to create awareness of the potential physical, liability and transition risks that Climate Change poses to businesses. These risks can have direct and indirect consequences relating to an organization's assets, operations, finances and reputation. The training program aims to empower businesses in building better resilience and help them prepare for the future in uncertain climate conditions by introducing and educating them on the ISSB Standards; IFRS S1 and IFRS S2.

The learning objectives of a ISSB Standards Training Course

1. Understanding the key principles of climate risk management and IFRS S1 & IFRS S2 framework
2. Recognizing and assessing the physical and transition risks climate change may pose to organizations and their value chain
3. Identifying the ways and applications of scenario analysis in risk assessment
4. Ability to enhance data-driven analysis of climate- related Risks
5. Alignment of ISSB framework with Organizational strategies
6. Effective Reporting and Risk Communication
7. Application of ISSB framework in current and future projects
8. Understanding the importance of engaging stakeholders to build support for Climate Risk management

PROGRAM DETAILS

Participants will learn how to integrate climate change and sustainability factors into financial decision-making, and leverage ISSB reporting to enhance risk assessment, disclosure, and engagement.

Through a mix of presentations, case studies, group discussions, and interactive exercises, our course will equip you with the knowledge and skills you need to implement the ISSB Sustainability Disclosure framework within your organization.

Training modules over two days

1. Introduction to ISSB Standards and climate change risks and opportunities
2. **Governance:** Discussing the role of the board and senior management in tackling climate risks and opportunities
3. **Strategy:** Developing and integrating climate change strategy into overall business strategy
4. **Risk management:** Identifying and assessing physical and transition risks associated with climate change
5. **Metrics and targets:** Identifying key indicators and setting targets to measure progress and identify gaps
6. **Scenario analysis:** Understand the use of scenario analysis to plan for the potential impacts of climate change and make informed decisions
7. **Reporting:** Preparing and presenting climate change impacts, risks and opportunities in annual reports aligned with ISSB Standards
8. **Implementation:** Integrating ISSB Framework and aligning them towards specific risk management systems such as sustainability frameworks.

ELIGIBLE PARTICIPANT

- Finance executive who are responsible for financial reporting in their organizations.
- Sustainability leaders and ESG specialists who focus on non-financial reporting, including climate-related risks and opportunities.
- Risk managers who need to identify and assess climate-related risks in their portfolios and companies.
- Investor relations teams who need to communicate climate-related information to investors and other stakeholders.
- Board members who need to oversee the management of climate risks and opportunities in their organizations.
- Consultants and advisors who provide advice on climate-related issues to companies and investors.
- Academics and researchers who are studying the effects of climate change on the financial system and other aspects of society.
- Assurer professionals who provide independent verification on the reliability and adherence of IFRS S2 disclosure information provided by companies.
- External auditors who are responsible for auditing the financial statements and disclosures of companies for completeness and accuracy, including IFRS S2 -related information.
- Advocacy groups and NGOs who encourage companies, investors and policymakers to be transparent in their disclosure of climate-related information or put pressure on them to adopt responsible climate practices.

INSTRUCTORS

Dr. Ali Darwin., Ak., M.Sc., CSP.

Chairperson of National Center for Corporate Reporting

ABOUT ESG ACADEMY

Soon every company must have sustainability strategy, otherwise they will be extinction. This is a challenging time in transformation of thought. Ideas like net zero, circular economy, re-generation, sustainable growth and business eco- system are helping all of us to re-evaluate, re-imagine and re-invent the future of our communities. Sustainability is the foundation for strategy, long-term growth, opportunity identification, and supporting an affiliated organization of NCCR, within one's social-political- economic eco-system. ESG Academy is dedicated to helping everyone meet this challenge of change. ESG is the heart of sustainability.
